Black Watch Pipers Thrill Crowd Liquor Lounge Bill With Drumming, Marching Show

By Lauretta Thistle Once again the Scots - this time in the persons of the

Black Watch Regiment-have landed and conquered. And if you were one of the thousands in the Auditorium last night who fell under the spell, there's no use whining that the bagpipes mesmerized you when you weren't on guard. That's simply an unwilling tribute to the canniness of a race

The regular bandsmen of the Black Watch band did their stint first.

And oh, the sighs of rapture that came from the audience (Irishmen and French-Canadians and Scots alike) when the pipers, in the Royal Stuart tartan, walked down the ramp! It was an audience ready to be wooed, but the performance was of high caliber, too-smart drumming, wonderfully precise embroidery of thin air with drum sticks, and all the mystical mummery that goes with an ancient and honorable tradi-

Spectacular Dancing

The dancers were fine, too -trim, well-set-up young fellows who gave a more lucid exposition of the precise heeland-toe work and shifting of weight in the sword dances than we remember seeing before, anywhere. The broadswords dance, towards the end of the program, was more spectacular and equally precise.

For all its excellence, how ever, this spectacle seemed a somewhat thinner show all round than the one provided by the Scots Guards two years ago. The band was less precise than that of the Scots Guards' for one thing, and there was less of that ceremonfal marching which won our hearts before.

We hope is isn't true, but we were afraid we saw slight signs of that slick, playing-to-, the-masses attitude in programplanning which has infected even the Military Tattoo at the Edinburgh Festival. Two medleys of popular airs in succesand it was alarming to hear the clarinets and horns attempting

a poor parody of the bagpipes. The show may have been diluted for the supposed tastes of audiences in the United States, perhaps on the advice of "experts". But we think the experts were wrong, and the more of the purity and nobility of traditional music and marching we get, the more everybody

will like it. But for all that, it was a fine evening of spectacle, and we had almost deafening proof that the massed band of pipers could keep in tune with bandsmen of a conventional band, playing The Highland Laddie.

Surely that proves conclusively that the bagpipes are a musical instrument after all? The case rests.

But, moreover, they must be people who are just as happy to make the government spend an extra few bucks on salaries as they are to save on the same outlay.

If the figures said "pay more" then the Bureau folks would be pleased to echo the voices of the adding machines

and the calculators. On the other hand they would not furtively change the record if those records chorused "civil servants have reached the level of outside employment-don't pay them

a cent more." In short the bureau must be absolutely impartial even at the expense of putting a few extra bucks in their own pay cheques each twice-amonth.

We think the Commission has made an excellent choice in Georges Gauthier who is to head the Bureau and Arthur Russell second-incommand. They're both experienced in auditing and accounting and one's English and the other French speak ing - that's impartiality at its best in this neck of the

provincial woods. Those who know Lyons Allen, who has been named temporary adviser to the Bureau, as we do, feel that no better choice could be possible. They will add the wish that this is a step that will focus some attention on his outstanding abilities and help him another rung up the quivering ladder of the car eer civil servant.

The same goes for Douglas Love-even though some staff side groups feel he may be a wee bit partial to the CSAO-we don't believe it, The Bureau can use his brains.

All this applies to Messrs. J. H. Scarfe and William Ley, also key Bureau per-
